Junior AI Engineer and Data Scientist (dual Master's in Data Science, graduated July 2026) with 6 months of hands-on experience building **RAG, speech and translation services** and **hybrid recommenders** inside a 30+ module, production-oriented SaaS platform (FastAPI, MongoDB, Redis, Docker). Built a **multimodal CTR model** (0.9495 validation AUC, 3.6M samples) and a multilingual RAG assistant. Available immediately; open to relocation.

Technical Skills

AI, GenAI & NLP: RAG, LLM integration, embeddings, vector databases (FAISS, ChromaDB), LangChain, LlamaIndex, Sentence-Transformers, Hugging Face, Whisper, NLLB-200, CLIP, prompt engineering
ML & Data Science: Python, PyTorch, TensorFlow/Keras, Scikit-learn, Pandas, NumPy, SQL, feature engineering, model evaluation, recommender systems, Power BI
Backend & MLOps: FastAPI, Flask, REST APIs, Docker, Redis, MongoDB, PostgreSQL, Git, CI/CD, Node.js/Express.js, React.js/Next.js, TypeScript
Languages: Arabic (Native), French (Fluent), English (Professional)

Professional Experience

AI & MLOps Engineer Intern – eGlobal Digital, Casablanca — Feb 2026 – Jul 2026

- Built **scoped RAG conversational services** (Sentence-Transformers, LangChain, ChromaDB) and integrated them into the FastAPI backend of **IVEP**, a production-oriented multi-role SaaS platform for virtual events (Admin, Organizer, Enterprise and Visitor portals; **30+ backend modules**).
- Integrated **multilingual speech and translation pipelines** into the platform: Whisper transcription and NLLB-200 translation across EN/FR/AR.
- Designed a **hybrid recommendation and matchmaking pipeline** combining behavioral signals, semantic representations and time-aware popularity.
- Evaluated it with **temporal train/test splits** so that models are tested on future interactions only, avoiding leakage.
- Worked across backend, AI and data deployment (**Docker, Redis, MongoDB, WebSockets/SSE**) in a multi-role platform with real-time features.

Full-Stack Developer Intern – Big4Com, Marrakech — Apr 2024 – Jun 2024

- Built **MyInvoice**, a full-stack invoicing platform for SMEs and freelancers, with customer management and automated PDF invoice generation.
- Designed and integrated **RESTful APIs** with Node.js/Express.js, backed by MongoDB for persistent storage.
- Developed a responsive **React.js** frontend connected to the API.

Web Developer Intern – Big4Com, Marrakech — Apr 2023 – Jun 2023

- Developed a travel agency web platform (PHP/Laravel, MySQL) with **online booking, data management and an administrative back-office**.
- Designed the **relational database** and implemented a responsive interface optimized for desktop and mobile devices.

Web Developer Intern – Province of Essaouira — Jun 2022

- Developed an **employee management website** (PHP, MySQL, HTML/CSS, JavaScript) and designed its database using the **Merise methodology**.

Projects

Course Materials RAG – Multilingual Knowledge Assistant — GitHub

- End-to-end multilingual **RAG system** for PDFs, text and YouTube transcripts: 768D Sentence-Transformer embeddings, **FAISS retrieval, MMR**, **Llama 3.3 70B**, FastAPI backend and React/TypeScript frontend with source attribution and course-scoped retrieval.

WWW 2025 MM-CTR Challenge – Multimodal CTR Prediction — GitHub

- Cascaded multimodal pipeline on **3.6M training samples and 91,718 items**: CLIP image/text embeddings (512D → normalized 128D) feeding a **Transformer + Deep Cross Network + DNN** CTR model; **0.9495 validation AUC**, trained with PyTorch on 2× Tesla T4 GPUs.

MovieRec – Adaptive Hybrid Recommender — GitHub

- Recommender on **MovieLens 100K (943 users, 1,682 movies)** that shifts from popularity (cold start) to content-based and collaborative filtering across **four rating-count tiers**; deployed in a Flask/React/MongoDB app with TMDB enrichment.

Education

M2 EIDD – Data Exploration and Decision Support, Sorbonne Paris Nord University (double degree) — 2025 – Jul 2026
Master WISD – Web Intelligence and Data Science, Sidi Mohamed Ben Abdellah University, Fez — 2024 – Jul 2026
Bachelor's – Software Engineering and Information Systems, Higher School of Technology, Essaouira — 2023 – 2024
DUT – Computer Science, Higher School of Technology, Essaouira — 2021 – 2023

Certifications

365 Data Science (2025): Machine Learning in Python · Deep Learning with TensorFlow 2 · Power BI · Data Ingestion with Pandas · Intro to Data Science
